Welcome to MiniDB Manager!

>>>show databases

Databases:

>>>create database db1

Database created.

>>>show databases

Databases:

db1

>>>create datbase db2

Error at database

>>>create database db2

Database created.

>>>show databases

Databases:

db1

db2

>>>

 C:\Users\Hemendra Roy\Desktop\DBMS\DB Manager.exe

>>>drop database db2

Database db2 removed.

>>>create database db3

Database created.

>>>show databases

Error at databases

>>>show databases

Databases:

db1

db3

>>>create table db1 tb1 (name age)
table created.

>>>create table db1 tb2 (name age)
table created.

>>>create table db2 tb1 (name age)
Database db2 doesn't exists.

>>>create table db1 tb2 (name age)
Table already exists.

>>>show tables db1

db1 Tables:

tb1

tb2

>>>insert db1 tb1 sameer 19
Data Added!

>>>insert db1 tb1 kabir 20
Data Added!

>>>insert db1 tb1 sahil 21
Data Added!

>>>view db1 tb1

name age

sameer 19

kabir 20

sahil 21

>>>insert db1 tb1 rohit 22
Data Added!

 C:\Users\Hemendra Roy\Desktop\DBMS\DB Manager.exe

>>>view db1 tb1

name age

sameer 19

kabir 20

sahil 21

rohit 22

>>>delete db1 tb1 5

Row 5 doesn't exists in table tb1.

>>>delete db1 tb1 3

Row deleted.

>>>view db1 tb1

name age

sameer 19

kabir 20

rohit 22
